Hills Of Semenyih

Life by the hills of Semenyih is a beautiful adventure when it is experienced at Setia EcoHill. Inspired by S P Setia's LiveLearnWorkPlay philosophy, the 673-acre award-winning township is one of the finest from the holistic Setia Eco-series.

As a green township, Setia EcoHill reserves more than 10% of the area (over 80 acres) as parkland and green spaces to create vibrant and diverse community in a landscaped, sustainable environment. This is one of the many ways this township contributes to sustainability.

Setia EcoHill is designed as an eco-township with the ideal setting for the community to create a self-sustaining lifestyle.

'Live Green!' is the philosophy that this township centres on, and its DNA is clearly reflected in its designs. The reserved green zones include a tree museum and engineered waterways to rehabilitate the original ecosystem.
